

Audi Approved Bodyshops

We're sure you understand the pleasure of driving an Audi and it's a feeling that shouldn't be interrupted. That's why, if you're unlucky enough to have an accident, our Audi Approved Bodyshops will do everything they can to minimise the inconvenience to you: from recovering your damaged Audi, to authorising repairs, managing your mobility needs and helping with your insurance claim process.

Nobody understands your Audi better than our Audi Approved Bodyshops. Our Technicians are factory-trained on every Audi vehicle and they receive specialist aluminium repair training, enabling them to carry out work on vehicles featuring Audi's new Aluminium Space Frame (ASF) technology. They ensure that repairs are carried out according to Audi's original specifications, using only genuine Audi replacement parts, approved paints and tooling.

Our Audi Approved Bodyshops give you the reassurance of knowing that repairs will be completed to the highest Audi standards that you've come to expect, upholding your paint and anti-perforation warranties and therefore protecting the resale value of your car.

So although you can't always be sure of what's in store on the road ahead, you can rely on an Audi Approved Bodyshop to ensure that your car continues to perform as you'd expect it to.
